Fully authorized to work in the U.S. - Green Card Holder

Senior iOS Engineer with **11 years** of native iOS specialization across the Apple ecosystem, delivering **pixel-perfect** products to **millions** of users in FinTech, Trading, Banking, EdTech, and Consumer domains. **Owns the full product lifecycle, not just individual tickets** - from architecture decisions to legacy-stack modernization - under **tight deadlines** and **ambiguous requirements**. Multiplies team impact by **mentoring engineers** and setting code-review standards, whether working **independently** or within large, **distributed cross-functional teams**.

EXPERIENCE

Innovat - Krasnodar, Russia (Remote) Jun 2024 - Oct 2026

Senior iOS Engineer

- Architected a native **EdTech** iOS app from the ground up **(Swift + VIPER,** multi-target) - working from **Figma designs** only with **minimal specs**. Shipped auth, home, profile, and cafeteria **payments/transfers** in **3 months** - released v1 to production in **9 months**.
- Shrank **app bundle size** by up to **30%** through **100% PDF asset deduplication** and **blending.**
- Implemented a custom networking layer in **Swift**'s **async/await,** improving speed and network success rate by **50%** with store caching.
- Published and maintained **6 app targets** via **TestFlight**, resolving **3 App Store review rejections**.
- Reduced **CPU usage**, **memory footprint,** and **rendering latency** by up to **2.5x** using Debugging Instruments and Crashlytics data.

EXANTE - Limassol, Cyprus (Remote) Sep 2023 - May 2024

Senior iOS Engineer

- Designed animated elastic headers for **2 unique broker trading apps,** improving on-screen data visibility by **35% in compact mode**.
- Boosted server data-exchange rate by **7%** using **raw Protobuf** messages over a **socket**, bridging a large **Objective-C** schema to **Swift**.
- Unified the authorization screen with **UIKit** and **SwiftUI,** integrated **Sign in with Apple** and **Google,** and **extracted** the flow (UI + logic) into a **standalone reusable module** published as its own repository, **shared across both apps**.

New Digital World - Wilmington, DE (Remote) Mar 2023 - Sep 2023

Senior iOS Engineer

- Launched **getBUS**, a transit app, natively for **iOS (Swift + VIPER)** with **analytics instrumentation**, **feature flags**, and **remote config**.
- Customized **UI/UX** design with fluid animations throughout and a custom algorithm computing live bus-pin heading and movement.
- Reached **20,000 users** and a **4.6 rating**, hitting the **#2 top** position in its **App Store category**. Introduced **watchOS app** functionality.

MTS Bank - Moscow, Russia (Remote) Nov 2021 - Feb 2023

Senior iOS Engineer

- Built QR payments for Business using **MVVM + Coordinators** + **RxSwift** architecture, optimized the payment transfer flow.
- Prototyped **OCR-based** invoice recognition to auto-fill bill payment forms.
- Raised the App Store rating from **2.8 to 4.5** through **A/B testing**, **analytics** event integration, and fixes **for memory leaks** and **crashes**.
- Refactored **2 major legacy** modules and established **2 CI/CD** pipelines, automated **Unit/UI tests**, and **SwiftLint** to a **0-warnings rule**.

VTB Bank - Moscow, Russia (Remote) Dec 2020 - Nov 2021

Senior iOS Engineer

- Delivered a tax-reporting and statistics module on **VIPER**, achieved **100% accessibility compliance,** and enabled debt payments.
- Enforced full **unit testing** coverage of business logic via **TDD**, **mocking**, and Xcode's code-coverage tooling, gating every merge.
- Onboarded **3** newly hired **senior iOS engineers** on accessibility-compliant coding, architecture, testing, and code-style standards.

Techno Service - Moscow, Russia (Remote) Jun 2016 - Dec 2020

iOS Engineer

- Pioneered an **offline-first** native **iOS** inspection app**.** Deployed via **MDM** to **200** technicians. Engineered the **Core Data** persistence layers with **versioned schema migrations**, syncing via defined end-to-end **backend API contracts** and **SMB** protocol once signal returned. Built a **semaphore**-controlled **concurrent sync algorithm, batching** large **datasets** into **multiple 3-step requests**.
- Extended a **C-based** FLIR thermal-camera **SDK** (**Bluetooth/Wi-Fi/Lightning/USB-C**) to compute **real-time** temperature extremes.

SKILLS

- **Languages**: Swift, SwiftUI, Objective-C, C/C++, Python, SQL, JavaScript, HTML, CSS
- **Architecture**: MVVM, VIPER, Clean, Modular, POP, Coordinator, Dependency Injection, Data Structures, Design Patterns
- **Testing:** XCTest, XCUITest, TDD, Unit, Integration, A/B Testing, Crashlytics, Xcode Performance Instruments
- **Frameworks**: UIKit, Foundation, SPM, CocoaPods, RxSwift, Combine, CoreData, SwiftData, CoreAnimation, MapKit, CoreLocation, Multithreading, GCD, async/await, Swift Concurrency, OperationQueue
- **Networking:** RESTful API, WebSockets, JWT, JSON, XML, WebView, JS Injection, SMB, Offline Mode, Live Streaming
- **AI & Machine Learning:** CoreML, On-Device ML, AI/ML Integration, AI-Assisted Development Tools (Claude Code, CodeRabbit)
- **Practices**: Agile, Scrum, Git, CI/CD, Advanced Analytics (Firebase, Amplitude), Figma, TestFlight, Subscriptions, In-App Purchases

EDUCATION

- **B.S. & M.S. in Computer Science** - Academy of Marketing and Social-Information Technologies (IMSIT), Russia 2010
