Senior iOS Engineer with **11 years** shipping native iOS (Objective-C, Swift, SwiftUI) and Android (Java, Kotlin) apps used by **millions** across FinTech, Trading, Banking, EdTech, HealthTech, Live audio/video streaming, and Consumer domains. **Owns products end-to-end, not just tickets** - under **tight deadlines** and **ambiguous requirements**. Raises team impact through **mentoring** and code-review standards, working **independently** or within large, **distributed cross-functional teams**. Uses Claude Code daily with mandatory code review and checks before shipping.

EXPERIENCE

Innovat Jun 2024 - Oct 2026
Senior iOS Engineer Krasnodar, Russia (Remote)

- Architected a native **EdTech** iOS app from the ground up **(Swift + VIPER, multi-target**) - working from **Figma designs** only with **minimal specs**. Released Auth, Home, Profile, and Cafeteria **payments/transfers** in **3 months** to production.
- Implemented a network layer **(async/await)** with store caching**,** cutting load time by **75%** and raising network success rate by 2**5%**.
- Reduced **CPU usage by 10%** and **rendering latency** by **2.5x** using Xcode Debugging Instruments and Crashlytics data.
- Shrank **app bundle size** by **30%** through **moving to 100% PDF asset deduplication** and **resources blending.**
- Published and maintained **6 app targets** via **TestFlight**, resolving **3 App Store review rejections**.

EXANTE Sep 2023 - May 2024
Senior iOS Engineer Limassol, Cyprus (Remote)

- Resolved a critical currency-conversion rounding bug within **2 hours,** stopping production losses across **two apps** and all trading pairs.
- Designed animated elastic headers for **2 broker trading apps,** improving on-screen data visibility by **35% in compact mode**.
- Boosted server data-exchange rate by **7%** using **raw Protobuf** messages over a **socket**, bridging a large **Objective-C** schema to **Swift**.
- Unified the authorization screen with **UIKit** and **SwiftUI,** integrated **Sign in with Apple** and **Google,** and **extracted** the flow (UI + logic) into a **standalone reusable module** published as its own repository, **shared across both apps**.
- Managed **10**+ typical memory leaks bound to **MVVM** on callbacks, preventing further occurrences by setting up a strict **SwiftLint** rule.

New Digital World Mar 2023 - Sep 2023
Senior iOS Engineer Wilmington, DE (Remote)

- Launched a transit app **getBUS** natively **(Swift + VIPER, Kotlin)** with **full analytics** instruments, **20 feature flags** and **remote config**.
- Customized **UI/UX** with fluid animations throughout and a **150 ms** faster on client algorithm computing live bus-pin movement.
- Reached **20,000 users** and a **4.7 rating**, hitting the **#2 top** position in its **App Store category**. Introduced **watchOS app** functionality.

MTS Bank Nov 2021 - Feb 2023
Senior iOS Engineer Moscow, Russia (Remote)

- Built QR payments for Business and cut transfer flow time by **40%** using **MVVM + Coordinators** + **RxSwift**.
- Prototyped **OCR-based** invoice recognition to auto-fill bill payment forms, saving **2 min** per payment document.
- Raised the App Store rating from **2.8 to 4.5** through **A/B testing** and **analytics** event integration.
- Refactored **2 major legacy** modules, trimming build time by **10%**, and fixed memory leaks and crashes for a **100% crash-free rate**.
- Established **2 CI/CD** pipelines with automated **Unit/UI tests** and **0-warnings SwiftLint** rule**,** cutting **TestFlight** delivery time **by 50%.**

VTB Bank Dec 2020 - Nov 2021
Senior iOS Engineer Moscow, Russia (Remote)

- Delivered a tax-reporting and debt-payment module (**Clean Architecture)**, achieving **100% accessibility compliance**.
- Enforced full **unit testing** coverage of business logic via **TDD**, **mocking**, and Xcode's code-coverage tooling, gating every merge.
- Onboarded **3** newly hired **senior iOS engineers** on accessibility-compliant coding, architecture, testing, and code-style standards.

Techno Service Jun 2016 - Dec 2020
iOS Engineer Moscow, Russia (Remote)

- Pioneered an **offline-first** native **iOS** and **Android** inspection app**.** Deployed via **MDM** to **200** technicians. Engineered the **Core Data & SQLite** persistence layers with **versioned schema migrations, SQL requests**, syncing via defined end-to-end **backend API contracts** and **SMB** protocol once signal returned. Built a **semaphore**-controlled incremental **concurrent sync algorithm, batching** large **datasets** into **multiple 3-step requests**.
- Extended a **C-based** FLIR thermal-camera **SDK** (**Bluetooth/Wi-Fi/Lightning/USB-C**) for **real-time** hotspot detection, slashing per-unit inspection time by **79% (7 min → 1.5 min).**
