Fully authorized to work in the U.S. - Green Card Holder

Senior iOS Engineer with **10+ years** shipping native **Swift** apps to **10 million** users across FinTech, Trading, Banking, EdTech, and Consumer domains. **Owns product end-to-end - not just tickets** - under **tight deadlines** and **ambiguous requirements**. Multiplies team impact through **mentoring** and code-review standards, working **independently** or within large, **distributed cross-functional teams**.

EXPERIENCE

Innovat Jun 2024 - Oct 2026

Senior iOS Engineer Krasnodar, Russia (Remote)

- Architected a native **EdTech** iOS app from the ground up **(Swift + VIPER, multi-target**) - working from **Figma designs** only with **minimal specs**. Shipped auth, home, profile, and cafeteria **payments/transfers** in **3 months** - released v1 to production in **9 months**.
- Implemented a network layer (**async/await)** with store caching**,** cutting load time by **75%** and raising network success rate by 2**5%**.
- Reduced **CPU usage by 10%** and **rendering latency** by **2.5x** using Xcode Debugging Instruments and Crashlytics data.
- Shrank **app bundle size** by **30%** through **moving to 100% PDF asset deduplication** and **resources blending.**
- Published and maintained **6 app targets** via **TestFlight**, resolving **3 App Store review rejections**.

EXANTE Sep 2023 - May 2024

Senior iOS Engineer Limassol, Cyprus (Remote)

- Resolved a critical currency-conversion rounding bug within **2 hours,** stopping production losses across **two apps** and all trading pairs.
- Designed animated elastic headers for **2 broker trading apps,** improving on-screen data visibility by **35% in compact mode**.
- Boosted server data-exchange rate by **7%** using **raw Protobuf** messages over a **socket**, bridging a large **Objective-C** schema to **Swift**.
- Unified the authorization screen with **UIKit** and **SwiftUI,** integrated **Sign in with Apple** and **Google,** and **extracted** the flow (UI + logic) into a **standalone reusable module** published as its own repository, **shared across both apps**.

New Digital World Mar 2023 - Sep 2023

Senior iOS Engineer Wilmington, DE (Remote)

- Launched **getBUS**, a transit app, natively **(Swift + VIPER)** with **full analytics** instrumentation, **20 feature flags**, and **remote config**.
- Customized **UI/UX** with fluid animations throughout and a **150 ms** faster algorithm computing live bus-pin heading and movement.
- Reached **20,000 users** and a **4.6 rating**, hitting the **#2 top** position in its **App Store category**. Introduced **watchOS app** functionality.

MTS Bank Nov 2021 - Feb 2023

Senior iOS Engineer Moscow, Russia (Remote)

- Built QR payments for Business and cut transfer flow time by **40%** using **MVVM + Coordinators** + **RxSwift**.
- Prototyped **OCR-based** invoice recognition to auto-fill bill payment forms, saving **2 min** per payment document.
- Raised the App Store rating from **2.8 to 4.5** through **A/B testing** and **analytics** event integration.
- Refactored **2 major legacy** modules, trimming build time by **10%**, and fixed memory leaks and crashes for a **100% crash-free rate**.
- Established **2 CI/CD** pipelines with automated **Unit/UI tests** and **0-warnings SwiftLint** rule**,** cutting **TestFlight** delivery time **by 50%.**

VTB Bank Dec 2020 - Nov 2021

Senior iOS Engineer Moscow, Russia (Remote)

- Delivered a tax-reporting and debt-payment module (**Clean Architecture)**, achieving **100% accessibility compliance**.
- Enforced full **unit testing** coverage of business logic via **TDD**, **mocking**, and Xcode's code-coverage tooling, gating every merge.
- Onboarded **3** newly hired **senior iOS engineers** on accessibility-compliant coding, architecture, testing, and code-style standards.

Techno Service Jun 2016 - Dec 2020

iOS Engineer Moscow, Russia (Remote)

- Pioneered an **offline-first** native **iOS** inspection app**.** Deployed via **MDM** to **200** technicians. Engineered the **Core Data** persistence layers with **versioned schema migrations**, syncing via defined end-to-end **backend API contracts** and **SMB** protocol once signal returned. Built a **semaphore**-controlled **concurrent sync algorithm, batching** large **datasets** into **multiple 3-step requests**.
- Extended a **C-based** FLIR thermal-camera **SDK** (**Bluetooth/Wi-Fi/Lightning/USB-C**) for **real-time** hotspot detection, slashing per-unit inspection time by **79% (7 min → 1.5 min).**

SKILLS

- **Languages**: Swift, SwiftUI, Objective-C, C/C++, Python, JavaScript
- **Architecture**: MVVM, VIPER, Clean Architecture, Coordinator, Dependency Injection, Modular Design, Design Patterns
- **Testing:** XCTest, XCUITest, TDD, Unit, Integration, Snapshot Testing, A/B Testing, Crashlytics, Xcode Performance Instruments
- **Frameworks**: UIKit, Foundation, SPM, CocoaPods, RxSwift, Combine, Keychain, CoreData, SwiftData, CloudKit, CoreAnimation, MapKit, CoreLocation, Multithreading, GCD, async/await, Swift Concurrency, OperationQueue, StoreKit, Subscriptions, In-App Purchases, Push Notifications and APNs, Deep Links, Universal Links
- **Networking:** RESTful API, WebSockets, JWT, JSON, XML, WebView, JS Injection, SMB, OAuth, Live Streaming, GraphQL
- **AI & Machine Learning:** CoreML, On-Device ML, AI/ML Integration, AI-Assisted Development Tools (Claude Code, CodeRabbit)
- **Practices**: Agile, Scrum, Git, CI/CD, Fastlane, Xcode Cloud, Advanced Analytics (Firebase, Amplitude), Figma, TestFlight

EDUCATION

- **B.S. & M.S. in Computer Science** - Academy of Marketing and Social-Information Technologies (IMSIT), Russia 2010
